

# VCTR

CLINICAL TRIALS REGISTRY SYSTEM

CONSOLIDATE. REVIEW. POST!

VCTR is the leading clinical trial registration and results disclosure solution. In production since 2005, VCTR was created to greatly reduce the cost, resources and time required to stay compliant with the rapidly changing registry disclosure process.

VCTR integrates all the compliance requirements based on current legislation, to help ensure that all your clinical data in public domain is accurately disclosed. Additionally, the VCTR Data Upload Utility automatically posts clinical trial information to US and international registry websites including [clinicaltrials.gov](http://clinicaltrials.gov), [clinicalstudyresults.org](http://clinicalstudyresults.org) and sponsor websites.

Rigid data constraints enforces compliance with [ClinicalTrials.gov](http://ClinicalTrials.gov) and [CSR.org](http://CSR.org)

Role-based user interface facilitates quick user adoption

Client configured workflow quickly guides users through the data entry, review, and approvals

Multi-level data validation checks helps eliminate posting errors

Configurable alerts, notifications and escalations reduce errors and expedites posting process

Automated data feeds for protocol and result data saves time

Transparent audit trail ensures compliance

Active user group allows for best practice sharing and learning

Validated application

Experienced deployment and support team ensures flawless registry posting
